Executive Summary

Undergraduate student with a solid foundation in **Data Structures & Algorithms** and hands-on experience in **Web Development** and **Machine Learning**. Proficient in building **responsive user interfaces** and applying **ML models** to solve practical problems. Committed to writing clean, reliable, maintainable code that follows best practices. **Eager to contribute** to technology-driven projects by applying core programming skills and gaining real-world experience.

Education

National Institute Of Technology, Andhra Pradesh

Aug 2023 - May 2027

B.Tech in Biotechnology with a minor in Software Engineering

- **CGPA : 8.74 / 10**
- Blending biotechnology with software engineering to build efficient, data-driven solutions through programming and analytical thinking for real-world challenges in healthcare and life sciences.

Experience

Web Developer Intern, V Dart

May 2025 - June 2025

- Designed and implemented internal **web applications** and **dashboards** to improve the data access and operational visibility, reducing manual reporting time by **40%** and enabling faster business decisions.
- Developed and maintained **responsive web interfaces** that streamlined recruiter workflows, cut down repetitive tasks by **50%**, and enhanced overall user experience for internal teams.
- Identified process gaps through hands-on observation and feedback, and contributed to building internal tools that increased **workflow transparency**, improved coordination across teams, and boosted day-to-day efficiency.

Projects

Personalized News Dashboard (News24X7)

[Github](#)

- Developed a responsive news dashboard using ReactJS and NewsAPI, integrating **real-time news feeds with user-specific filtering** by categories and preferences.
- Enhanced user experience with intuitive UI features for **dynamic content interaction**.

Drug-Drug Interaction Severity Prediction

[Github](#)

- Designed a **machine learning framework** to predict drug-drug interaction severity using **molecular fingerprints**.
- Worked with **real-world datasets**, applied **feature engineering**, and used **SHAP** to interpret model predictions, achieving a model **accuracy of 92%**.

Technical Skills

Programming Languages: Python, Java, JavaScript, PHP, MySQL, R

Web Development: React.JS, Node.JS, REST API, HTML5, CSS3, Tailwind CSS,

Machine Learning & Data Analysis: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Development Practices & Methodologies: Version Control (Git), Agile Methodology (Scrum)

Certifications

Java with DSA and System Design @ PWSKILLS

[Certificate](#)

Fundamentals of Deep Learning @ NVIDIA

[Certificate](#)

Python for Data Science @ Scaler

[Certificate](#)

SQL & RDBMS @ IBM

[Certificate](#)
